PROTECT YOUR INCOME

Your Family Counts on You

Your income is the engine of your household. It pays the mortgage, puts food on the table, covers your children's education, and funds your retirement. But what happens to your family if that engine stops?

Life insurance replaces your income when you can no longer provide it. A properly structured term or permanent policy ensures your family can maintain their standard of living even in the worst-case scenario.

Without coverage, the average family would exhaust their savings in less than 6 months following the loss of a primary earner.

DBA AGENT TIP:

Ask your agent about income replacement coverage -- how many years of income does your family need protected?

2

BUILD TAX-FREE WEALTH

Grow Money the IRS Can't Touch

Permanent life insurance with an Indexed Universal Life (IUL) component allows your cash value to grow linked to market performance -- without the risk of losing money when markets drop.

Unlike a 401(k) or IRA, the money inside an IUL grows tax-deferred and can be accessed tax-FREE through policy loans. That means you can supplement your retirement income without triggering a tax bill.

High-income earners, business owners, and families who have maxed out their 401(k) contributions use IUL as a powerful additional strategy.

DBA AGENT TIP:

Ask your agent to show you a side-by-side illustration comparing an IUL to your current savings strategy.

3

ACCESS LIVING BENEFITS

Use Your Policy While You're Alive

Modern life insurance policies include living benefits -- riders that allow you to access your death benefit EARLY if you are diagnosed with a critical, chronic, or terminal illness.

That means if you suffer a heart attack, stroke, cancer, or need long-term care, you can receive a portion of your benefit to cover medical bills, home care, or lost wages -- while you're still living.

This feature is often included at no additional cost and can be the difference between financial survival and bankruptcy during a health crisis.

DBA AGENT TIP:

Ask your agent which carriers offer the strongest living benefit riders -- not all policies are equal.

4

SECURE YOUR RETIREMENT

Never Outlive Your Money

Fixed Indexed Annuities (FIAs) provide something most retirement accounts cannot -- a guaranteed income stream you cannot outlive.

Your principal is protected from market losses. Your growth is linked to market indexes. And at retirement, you can turn your accumulated value into a lifetime monthly income.

Social Security alone covers only 40% of pre-retirement income for the average American. An annuity fills the gap so you never have to choose between paying bills and enjoying retirement.

DBA AGENT TIP:

Ask your agent to run an annuity illustration showing your projected monthly income at retirement.

5

LEAVE A LEGACY

Give Your Family a Head Start

Life insurance is the most efficient wealth transfer tool available. For a fraction of what you pay in premiums, your beneficiaries receive a 100% income-tax-free lump sum -- often within 30 days of a claim.

A \$500,000 policy could pay off your home, eliminate debt, fund your children's college education, and leave your family financially free -- all from a policy that costs less than most car payments.

Generational wealth doesn't require generational wealth to start. It requires a decision, a plan, and one conversation with an agent.

DBA AGENT TIP:

Ask your agent about laddering multiple policies to maximize coverage during your highest-risk years.

Ready to Protect Your Family's Future?

Your Dynasty Builders agent is ready to build a personalized protection plan that fits your family and your budget.

No pressure. No obligation. Just clarity.
